

PROSPECTIVE QUESTIONS FOR MASTER STUDENTS

Name of Student: _____ Year in Program: _____ Committee Meeting Date: _____
Research Director & Chairperson of Examining Committee: _____

Note: The purpose of the questions below is to ensure that students comply with the School of Science policy regarding the maximum time allowed for students to complete their Masters Degree. (Master graduate students admitted to our program are guaranteed support by the Department for two academic years (August to May) Master candidates will be terminated after six semesters.). The questions also provide a format for the committee and students to 'look forward' during annual research conferences to complement viewing a student's progress to date.

1. What is the projected timeline to completion of your thesis research? That is, what data or experiments do you need to/be completed to achieve objectives of the study, and what is their anticipated time of completion?

Student's response:

2. What are the publishable units of the project? What parts of your thesis research are ready to be written for publication? What parts are anticipated to be ready in the upcoming year?

Student's response:

3. What are the future goals of the student, and the anticipated steps to achieve these goals ?
