TOGETHER WE CAN!

ENIGMA

TOURETTE SYNDROME

Enhancing Neuroimaging Genomics through Meta-analysis

ENIGMA-TS is an international collaboration to understand the cause of Tourette Syndrome and work towards individualized patient care.

RESEARCHERS FROM AROUND THE WORLD ARE JOINING FORCES TO STUDY BRAIN STRUCTURE AND FUNCTION IN TOURETTE SYNDROME AND RELATED DISORDERS.
ENIGMA-TS
MEMBERS GAIN ACCESS TO OUR JOINT RESOURCES AND DATABASE!

Initial goal: Meta-analysis of structural brain MRI and rsfMRI data for 1,000 patients.

JOIN NOW IF YOU

- would like to work with us on uncovering the cause of Tourette Syndrome and help in improved diagnosis and management.
- can contribute previously collected data on Tourette Syndrome neuroimaging (raw data or summary statistics for meta-analysis).
- are planning to begin collection of Tourette Syndrome neuroimaging data.
